

Paper Elephant

Audience

Designed for ages 5-12 years old.

Materials Needed

- Scrapbooking Paper or Large Square Piece of Paper
- Construction Paper
- Straw
- Scissors
- Glue
- Crayon and/or Markers (Optional)

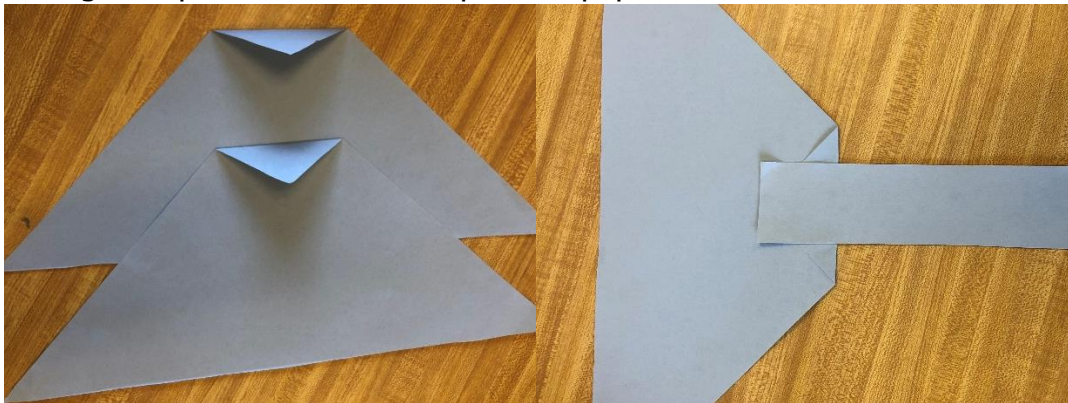

Length of Activity

30 minutes

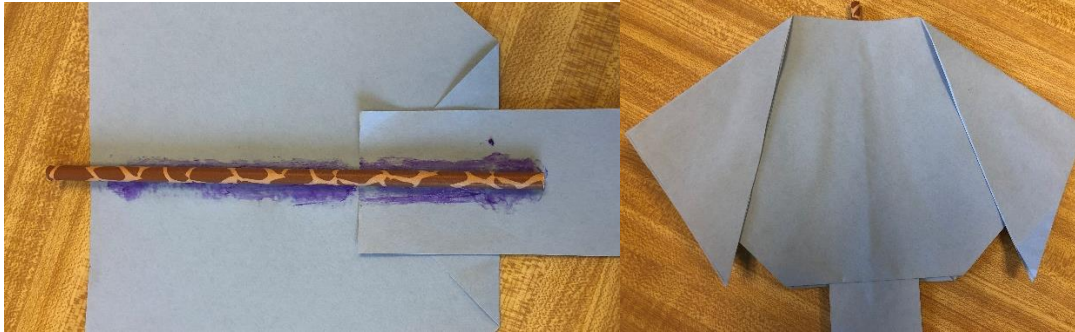

Procedure

1. Take your square piece of paper and fold it in half to make a triangle. Open the fold and cut on the fold like you created to make two triangle pieces of paper.
2. Fold one corner of the triangle inward so it points to the long side of the triangle. Repeat on the second piece of paper.

3. Cut a long strip of paper, about 2 inches wide from a long piece of paper. This will be the trunk of your elephant.

4. Glue down the triangle flap on one of the pieces of paper and then glue the trunk on top of the flap.
5. Next, put a line of glue from the top of the trunk to the long side of the triangle and put your straw on top. Make sure your straw sticks over a little on the long side of the triangle and a little onto the trunk.

6. Take your second large triangle and glue over the first, sandwiching the straw between the pieces of paper. Flip over.
7. Fold down and glue the points of the triangles to create ears.
8. Cut eyes and tusks out of construction paper and glue on. Add any decorations at this time.
9. Flip over and roll trunk up using a pencil and then you are finished!

10. Blow on your straw to make the trunk move!
